SKILLS

BUSINESS ANALYSIS

Requirements elicitation · BRDs & user stories · Acceptance criteria · Workshops & JAD · Gap analysis · UAT · Change management · Jira & Confluence

PROCESS

BPMN (L0–L4) · Value stream mapping · Journey mapping · SOPs & controls · Visio · FICA, CDD & EDD · Risk management

DATA

SQL · Power BI · DAX · Power Query · Star schema · Advanced Excel · Python · AWS (S3, Glue, Lambda)

Ntiyiso Wayne Ndhlovu

Business Process Analyst

IT · **Processes** · **Data** | African Bank, Business & Commercial Banking

Profile

Business Process Analyst at African Bank, working where IT, processes and data meet. I'm a computer science graduate with four years of business analysis across two banks: running requirements workshops, modelling processes in BPMN from value stream (L0) down to work instruction (L4), and writing the SOPs teams work from. I'm now building towards **BI and data engineering** with Power BI, SQL and AWS, so the processes I design can be measured.

4 yrs business analysis in banking	**7 yrs** across IT, operations & banking	**L0–L4** value stream to SOP	**CDMP** DAMA-certified in data management

Experience

Business Process Analyst
Sep 2026 – Present

African Bank · Midrand

Promoted from Business Analyst. Process design and documentation for Business & Commercial Banking.

- Map value streams and break them down into BPMN models from L0 to L4.
- Design SOPs, process controls and operating practices for client servicing and enquiry processes.
- Define processes with Customer Operations and IT teams so the documented process matches the systems and the people doing the work.
- Build process analysis decks and templates that keep stakeholder reviews consistent.

Business Analyst
Mar 2025 – Aug 2026

African Bank · Midrand

- Analysed end-to-end client lifecycle processes in Business & Commercial Banking: onboarding, account servicing, card orders, client service and maintenance.
- Ran stakeholder interviews and workshops, and built current- and future-state models with BPMN and value-stream mapping.
- Wrote business requirements, user stories and acceptance criteria, and defined UAT scenarios.
- Used process and customer journey data to find bottlenecks, turnaround-time issues and SLA risks.
- Applied FICA, CDD and EDD requirements when redesigning client and account processes.
- Worked across Business, Operations, Technology, Risk and Compliance to agree requirements and align on solutions.

Junior Business Analyst
Sep 2022 – Mar 2025

Sasfin Bank · Johannesburg

- Documented process flows and wrote SOPs, user manuals and role definitions.
- Ran requirements and JAD workshops, and turned business needs into technical specifications for IT projects.
- Wrote test scenarios and cases, and logged defects in test reports.
- Supported change management and user adoption for new processes and systems.
- Read entity relationship diagrams to keep data accurate across systems.

CERTIFICATIONS

Certified Data Management Professional, Associate
DAMA International · 2024

Agile Banking Professional Plus 4.0
Cornerstone Performance Solutions · 2023

BSc Honours, Information Technology
Richfield Graduate Institute · 2026

BSc Computer Science & Informatics
University of Johannesburg · 2018

SHORT COURSES · UCT

Business Systems Analysis
May 2025

Data Analysis
Mar 2025

Data Science with Python
Jan 2025

LANGUAGES

English · Xitsonga

Operations Specialist — Jan 2021 – Aug 2022

Bolt South Africa · Johannesburg

- Analysed supply metrics and ride trends to find performance bottlenecks.
- Built dashboards and reports for the operations team.
- Collected and validated driver and ride data from internal systems.
- Worked on data-driven strategies to improve driver retention.

Data Capturer — Feb 2020 – Sep 2020

Shell Energy · Johannesburg

- Moved paper records into database systems and checked entries for errors.
- Improved the capture workflow by tracking where errors came from.

Graduate Software Developer — Jan 2019 – Jan 2020

Infomage Rims Group

- Built features and fixes in C#, SQL and Python, and ran unit and integration tests.
- Helped with requirements analysis for the Skillzbook and Sigma7 learning platforms.

Personal projects

FMCG Sales, Marketing & Profitability

Power BI · DAX · Power Query · Star schema · Forecasting

Six-page Power BI report on where a consumer goods business makes and loses money, built on 18,240 order lines across 17 countries and three years. Business questions defined up front as six case studies, with 12 reconciliation checks against the source data before any finding was reported.

$14.45M net revenue **22.9%** profit margin **12/12** checks reconciled

HR Attrition Analytics

Power BI · DAX · Power Query · Star schema · BRD & user stories

Three-page Power BI report on why 237 of 1,470 employees left, run like a work project: BRD and user stories, a 10-stage analytics life cycle, a validated star schema and recommendations for HR leadership. Overtime was the strongest driver, at 30.5% attrition against 10.4%.

16.1% attrition rate **1,470** employees **~84** leavers avoidable
